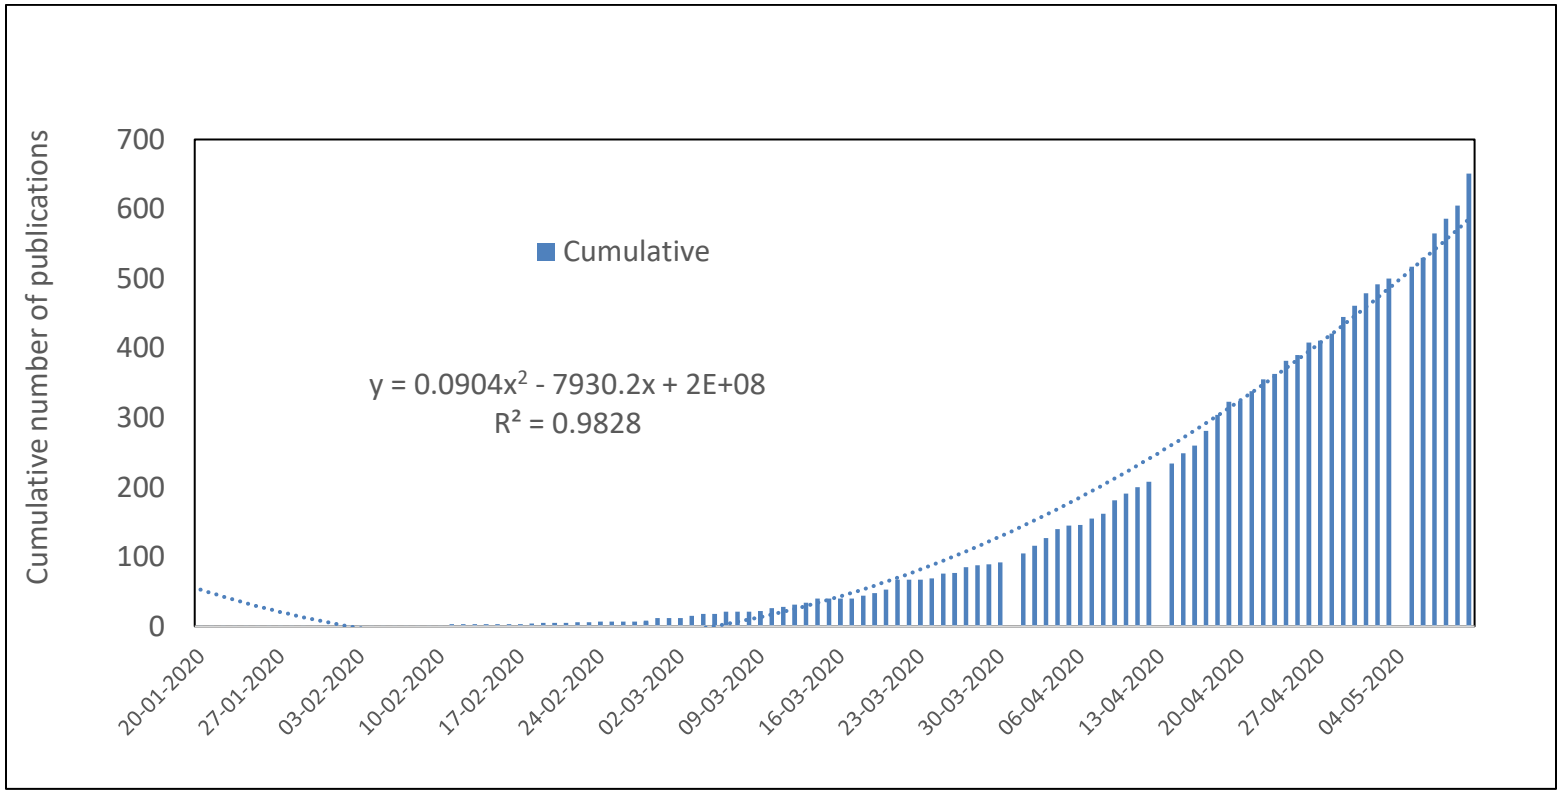
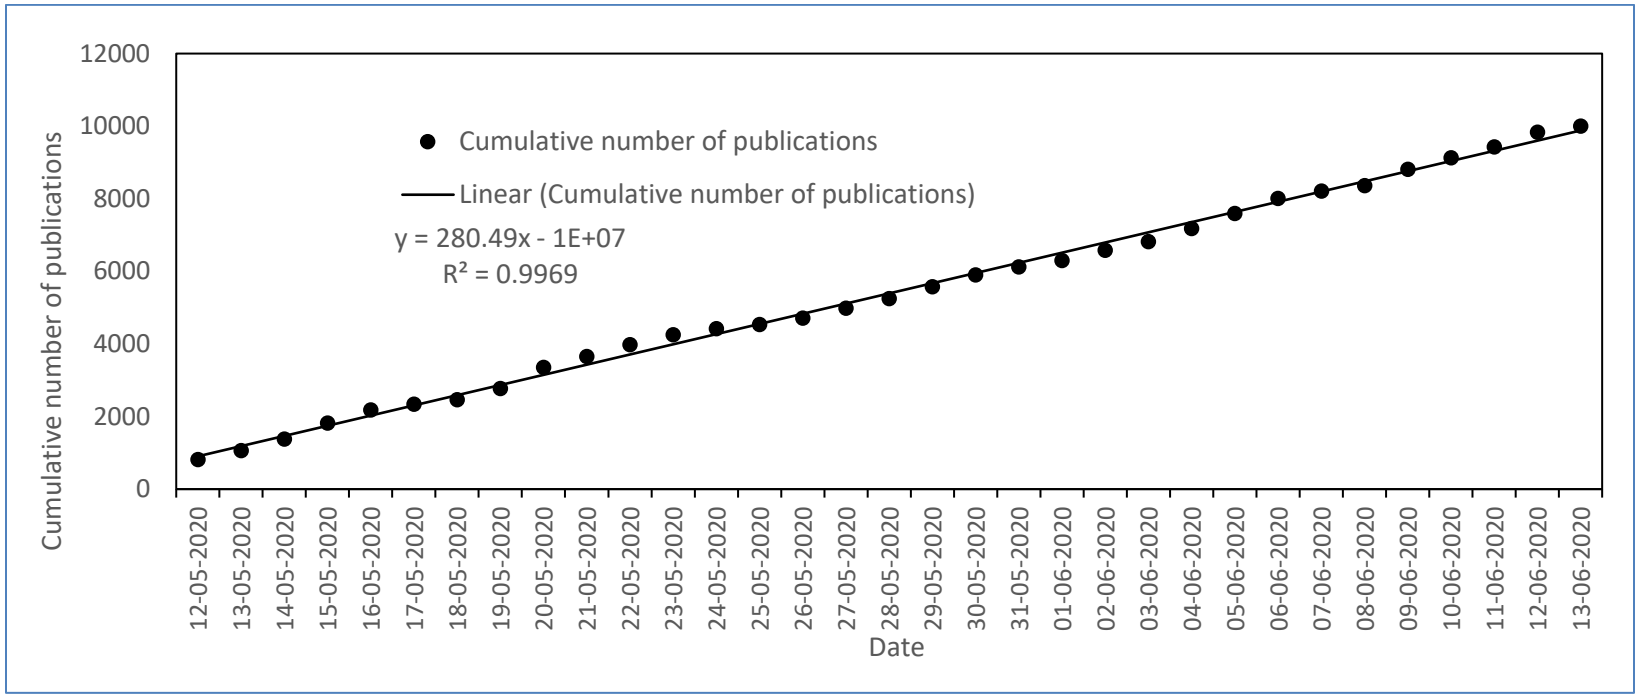
Supplementary Material For

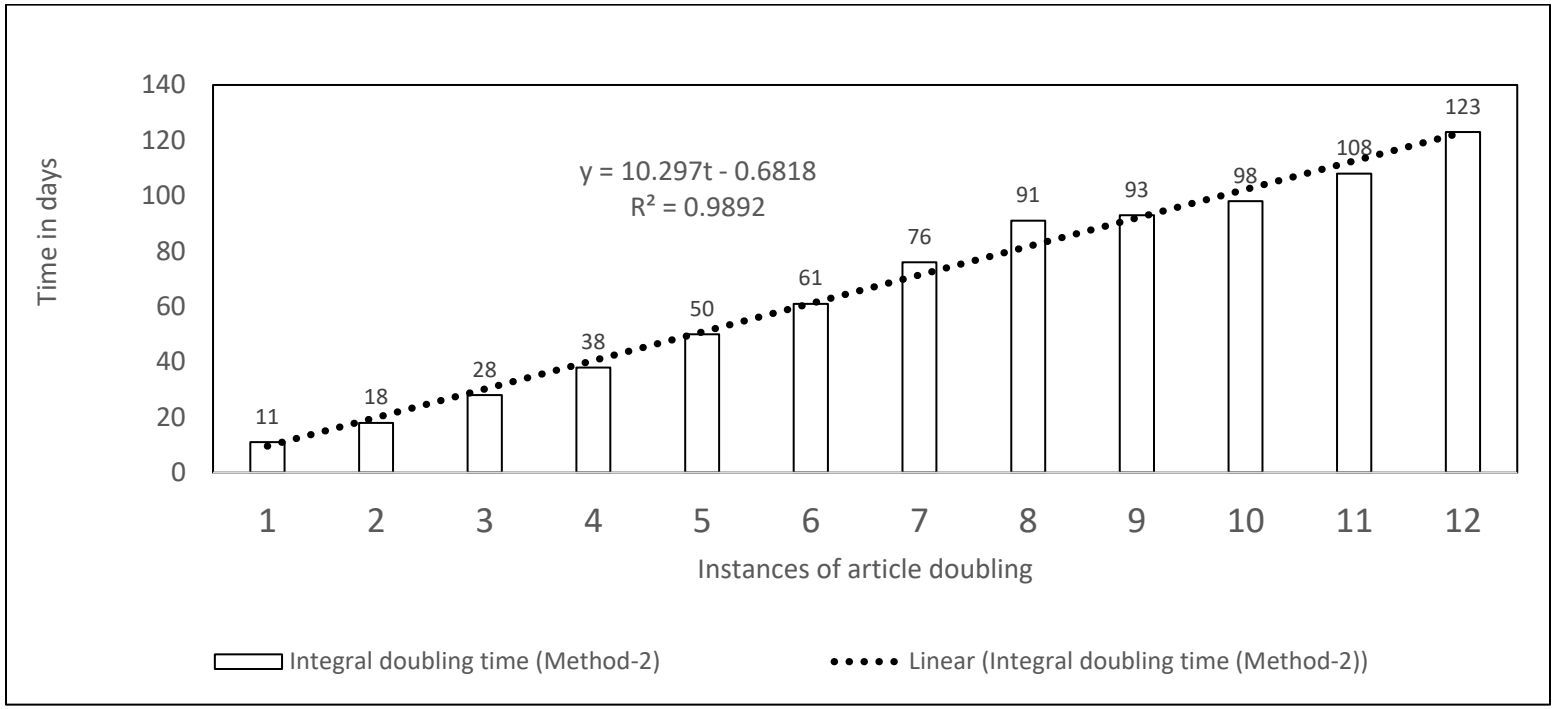
Evaluation of the dynamics of large scale covid-19 related literature through Bibliometric analysis from a mathematical standpoint.



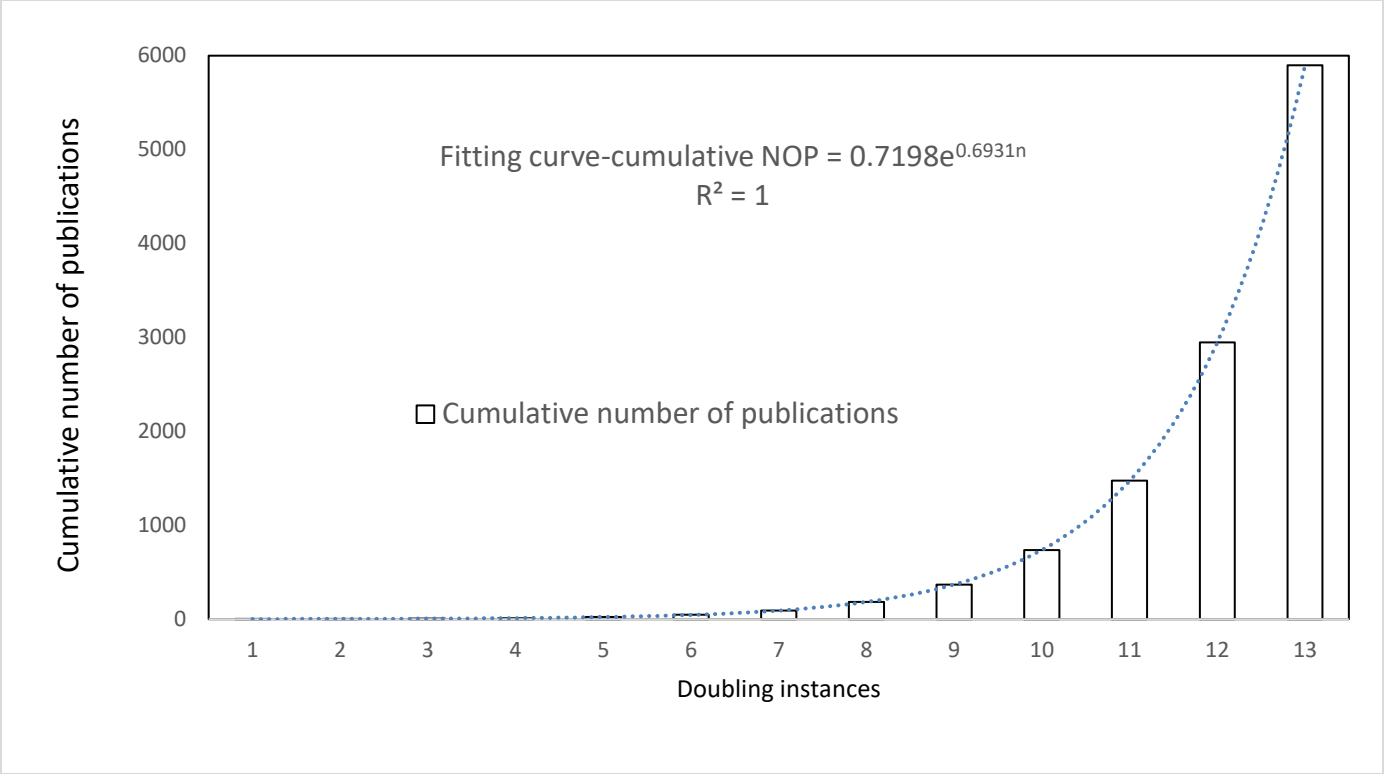
Supplementary figure-1: Cumulative number of publications as a function of days , PubMed All articles 20-02-2020 to 10-05-2020



Supplementary figure-2: Cumulative number of publications as a function of days , PubMed All articles 11-05-2020 to 13-06-2020



Supplementary figure-3 : PubMed “all articles”: Article doubling as a function of time (days), total 12 doublings in the number of articles in 123 days



Supplementary figure-4: Cumulative number of publications as a function of doubling time (Elsevier)- fitted with an exponential curve $0.7198e^{0.6931n}$ with fitting accuracy of 100%

Supplementary table-1 : Journals (as per number of publication)- Pubmed all articles

Sr. No	Journals (as per number of publication)	Number of Publications	Sr. No	Journals (as per number of **publication**)	Number of Publications	Sr. No	Journals (as per number of publication)	Number of Publications	Sr. No	Journals (as per number of publication)	Number of Publications
